

# INNO 2 Cloud System

## What is INNO 2 Cloud System?

INNO 2 Cloud system is a powerful IoT cloud platform utilising AWS for the next generation connectivity of IoT devices.

### Information up front

The dashboard of the INNO 2 web portal presents a summary of all connected devices

### Easy to connect

INNO 2 Cloud System works with the INNO 2 RTU to connect with devices such as Autosamplers for remote control

### Clear view

Information is clearly displayed without any clutter

### Real-time data

Data is collected from all connected devices and is presented live

### User friendly experience

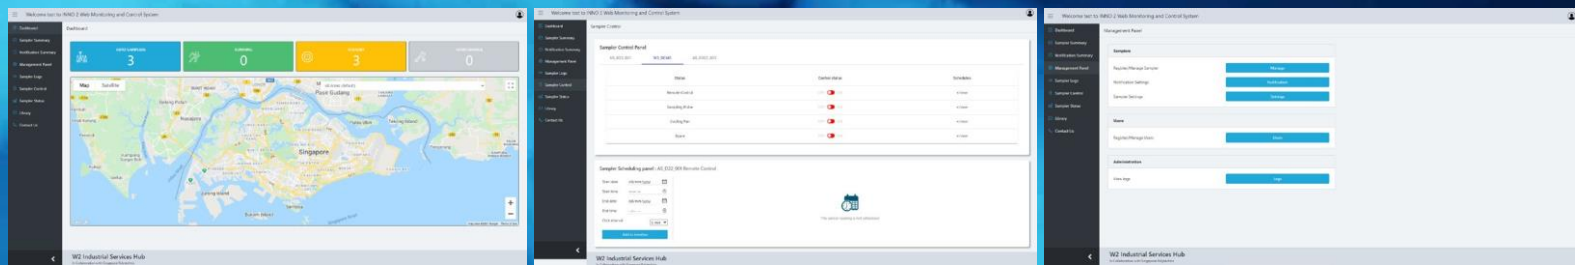

A simple interface gives you ease of accessibility with no learning required

## Why choose INNO 2 Cloud System?

In addition to features listed above, using cloud computing systems also provide the following benefits:

- Virtualization for maximum utilisation
- Dynamic resource allocation
- High availability
- On-demand self-service
- Access from anywhere
- Easy to manage

Wastewater Sampler

VOC Meter

Gas detector

Figure showing the connectivity of INNO 2 Cloud System, RTU and connected devices

An example of use would be with our INNO2 RTU unit that is connected to a Wastewater Sampler. The INNO 2 RTU receives inputs and outputs and from the sampler and INNO2 Cloud for remote monitoring and control. This allows you to change the settings of the sampler without going on-site as you can do so via the web portal dashboard. This saves the time and labor required to go on-site to program the sampler.

**Usage example:** Remote control of Wastewater Samplers using INNO2 Cloud and INNO2 RTU

**About Us**

W2 Industrial Services Hub is committed to providing reliable and best-fit products and services tailored to specific customers' need. As a dynamic organization, we see ourselves as the preferred agent of well-established products serving the spectrum of the industries. The list of products that we represent is testimonial to our achievements.
